

GRANITE AND QUARTZITE

MAINTENANCE AND CLEANING

ORDINARY CLEANING:

THERE ARE NO SPECIFIC INDICATIONS TO FOLLOW DUE TO ITS HIGH RESISTANCE TO ABRASIONS AND STRESSES. WE RECOMMEND TO ALWAYS PAY ATTENTION AND IMMEDIATELY REMOVE THE STAINS. IN CASE STAINS APPEAR DUE TO ABSORPTION, THEY WILL BECOME LIGHTER AFTER A FEW MONTHS. ACID SUBSTANCES (LEMON, VINEGAR, TOMATO JUICE) DO NOT LEAVE TRACES FOLLOWING A REGULAR CLEANING. AVOID PROLONG CONTACT WITH HOT POTS BY ALWAYS USING POT MATS OR SIMILAR ITEMS. ARE RESISTANT TO SCRATCHES. NONETHELESS, FOR A HIGHER DURABILITY OF THE ORIGINAL ASPECT OF THE TOP, WE ALWAYS RECOMMEND THE USE CHOPPING BOARDS. EVEN THOUGH HAVE AN EXTREMELY COMPACT SURFACE, IT STILL IS A NATURAL MATERIAL WITH A POROUS SURFACE. THIS MAKES IT SENSITIVE TO OILY AND GREASY SUBSTANCES THAT ARE LIABLE TO CAUSE STAINS IN CASE THEY ARE NOT PROMPTLY REMOVED. PROMPTLY REMOVE BY MOPPING WITH PAPER TISSUES, DEGREASE WITH SPECIFIC A SPECIFIC DETERGENT AND RINSE. AVOID USING LIQUID DE-GREASING DETERGENTS WITH A CORROSIVE COMPONENTS (DESCALING PRODUCT).

IN ORDER TO MAKE AS BRILLIANT AS IF THEY WERE NEW, WE SUGGEST TO USE A MIXTURE OF WATER, ALCOHOL AND DISH DETERGENT, CLEAN WITH A SPONGE AND RINSE ACCURATELY.

ANTI-STAIN TREATMENT

IN ORDER TO MAINTAIN THE ORIGINAL STATUS OF THE GRANITE AND AVOID THE ABSORPTION OF OILY SUBSTANCES IN THE LONG RUN, WE SUGGEST TO COMPLETE A PERIOD WATER-REPELLENT ANTI-STAIN TREATMENT THAT IS CAPABLE OF INTERVENING BEFORE THE LIQUID PENETRATES IN THE STONE PORES.

REVITALIZING TREATMENT (NO SHINY SURFACES)

THE TOPS ARE PRODUCED WITH A SPECIFIC TREATMENT TO GUARANTEE THE SPARKLING AND BRILLIANCE OF GRANITE. USUALLY, A SUBSEQUENT TREATMENT AFTER A PERIOD OF TIME IS NOT NECESSARY.

NEVER USE:

DISINCRUSTANT PRODUCTS, DESCALING PRODUCTS, MURIATIC ACID, HYDROFLUORIC ACID; PHOSPHORIC ACID, ABRASIVE DUSTS SPONGES AND ABRASIVE METAL SCRUB PADS. AVOID USING KNIFE DIRECTLY ON THE SURFACE.

CLEANING SUGGESTIONS

CLEANING OF SPECIFIC STAINS

Intervention	Suggested method and products	remove immediately:
Removal of stains (immediate)	Sponge with water and neutral detergent.	Pure vinegar Wine, Beer and Spirits Coke and sparkling drinks Oil and greases
Hygiene and cleaning (daily)	Sponge with water and neutral detergent. Solution with 50% methylated spirit and warm water for strongest stains.	Dairy products and cheese Meat, fish, eggs Coffee and tea Tomatoes Lemon, orange
Anti-stain treatment (annual)	Anti-stain treatment for granite surfaces. (we suggest Fila products).
